Faaiz Ali Tariq

Backend Developer
faaizalitariq@gmail.com | +92 3012808120 | Bahawalpur Pakistan

EDUCATION

THE ISLAMIA UNIVERSITY OF BAHAWALPUR — 01-02-2022 - 31-01-2026
BS Software Engineering — Bahawalpur, Pakistan
CGPA: 3.47

EXPERIENCE

ENIGMATIX | Backend Developer — Bahawalpur, Pakistan | Mar 2024 – Present

Aviso | Enterprise AI Forecasting & Revenue Analytics

* Led migration from a monolith to scalable **microservices** , improving maintainability and independent deployments.
* Designed **PostgreSQL** and **MongoDB** architecture for high-volume, **multi-tenant** analytics.
* Built distributed pipelines using **Celery** , **Redis** , and **Databricks** for scalable workload processing.

Dragonfly Intelligence | Geopolitical Risk Platform

* Developed **Python REST APIs** and **RAG pipelines** to ingest and route large-scale global news datasets in **Google Cloud BigQuery** .

Hotto Care Management | Hospital Management System

* Built scalable **Flask APIs** and **Firestore** schemas with **RBAC** for medical workflows and patient records.
* Integrated **Google Calendar API** and developed a custom **Python PDF reporting** module.

AI Engineering & Agentic AI Projects

* Built **AI Support Engineer** , combining **RAG** , vector search, **LLM tool calling** , and database tools for policy and customer-data queries.
* Built document ingestion and semantic retrieval pipelines using **ChromaDB** and **Sentence Transformers** .
* Developed **LangChain/LangGraph** agents for intent-based tool routing and stateful AI workflows.
* Built **MCP servers** with **Python/FastAPI** and local **Ollama** workflows with tool calling and structured outputs.

Restaurant App | Conversational AI Integration

* Integrated **MCP** servers with a **FastAPI** backend for customer queries, menu retrieval, and order management.

Automation & Workflow Projects

* Built automated extraction and workflow systems using **Selenium** , **Beautiful Soup** , and **n8n** for scraping and parallel task processing.

SKILLS

Programming Languages	Python
Libraries/Frameworks	Flask, FastAPI, Django, Celery, Selenium, RESTful APIs, Microservices, LangChain, LangGraph
Tools / Platforms	Git, Linux, Docker, Docker Compose, GCP, Databricks, Postman, JWT, Unit Testing, Agentic AI, LLMs, RAG
Databases	PostgreSQL, MongoDB, FireStore, Redis, chromeDB
